1.1 Safety Information and Precautions

- ◇ It is forbidden to use the device near water, corrosive gas, combustible gas, inflammable and explosive materials, otherwise it will cause electric shock, combustion or explosion.
- ◇ Prohibit the use of this device in places that restrict or prohibit the use of this device, otherwise it may lead to an accident.
- ◇ The high voltage of the frequency inverter will remain for a period of time after the power is off. Please do not remove the wire or touch the terminal within 3 minutes of power off, otherwise there is a danger of electric shock.
- ◇ Make sure that the earth terminal of the inverter is grounded reliably. Otherwise, there is a risk of electric shock.
- ◇ Do not contact with the internal components and circuits of the frequency inverter. Otherwise, there is a risk of electric shock.
- ◇ It is forbidden to modify the internal parts or circuits of the frequency inverter.
- ◇ This series of inverters are used to control ordinary asynchronous motor and frequency conversion asynchronous motor, not for single-phase motor and other applications.
- ◇ Do not use damaged inverter, otherwise it may cause an accident.
- ◇ Please select a safe position to install servo inverter to prevent direct exposure to high temperature and sunlight, avoid dampness, splash of water droplets and erosion of various oils, avoid metal powder or iron chips into the inverter.

1.2 Operation Precautions

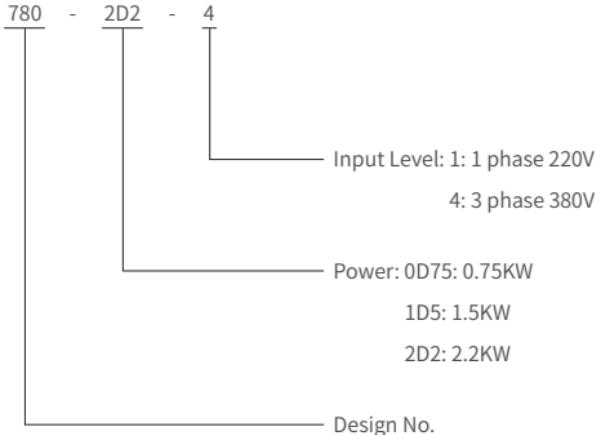

- ◇ It must be connected, installed and operated by a professional.
- ◇ Wiring shall not be connected when the power supply is turned on, otherwise it may cause electrical shock or injury to personnel.
- ◇ Terminal voltage and polarity must be applied to prevent damage to equipment or injury to personnel.
- ◇ Please do not pass the power line and signal line through the same pipe, and do not tie them together.
- ◇ Frequency inverter must be matched with the asynchronous motor, and maintain good heat-dissipation conditions.
- ◇ Do not touch the heat sink and brake resistor of the inverter while running, otherwise you may burn.
- ◇ Please do not switch power supply frequently, it is best to control the interval of more than 1 minute.
- ◇ **The AC power supply is prohibited from being connected to the output terminals U, V, W of the frequency inverter, otherwise the internal damage of the frequency inverter can be caused.**
